Test Engineer (Electrical)

Location: Switzerland, Basel

Deadline: ASAP

Reference: AQSE-415254

For our Client, located in Basel (Switzerland), Sapienza is looking for a test engineer with several years working experience in benches (or equivalent) hardware / software test and a good level of computer skills. Assets in EMC would be significant. RF knowledge would be a plus.

Responsibilities (under the supervision of a Test Leader, the candidate shall be able to):

- During design phase of the bench:
    - Participate to the definition of the various test setups
    - Participate to the bench test plans and procedures setting up
- During test phase of test bench:
    - Perform the test activities
    - Identify deviations between test plan / procedure, Customer specification and bench behavior
    - Initiate anomaly investigations / fixing-up
    - Support design and development team during anomalies fixing-up
    - Setup relevant technical documentation (test report, Non Conformance Report,…)
- During commissioning phase of bench:
    - Participate to the bench commissioning
    - Perform user training
- Overall:
    - Synthesize test progress in order to report to Test Leader
    - Participate to the test schedule definition

Profile
- A relevant University degree (physics or electronic engineering)
- 2-4 years working experience in benches (or equivalent) hardware / software test
- Good level of computer skills.
- Assets in EMC would be significant.
- RF knowledge would be a plus.
- Digital and analogical electronics knowledge
- Electrical power and distribution knowledge
- Bus communication knowledge is a plus.
- Self –sufficiency in the daily job
- Used with ISO9001 : 14001 standards.
- Methodical and organised.
- Available and autonomous.
- Teamwork ability
- Good relationship.
- Fluent in English, professional German nice to have and French a plus
